

# Making Animal Chains

You can make a series of animals to hang for decorations. When you are cutting these animals, you must remember that the animals should be attached at several points. You may use the patterns below or make your own.

Once you have drawn your animal and know how big your animal will be:

1. Fold the paper to that width like an accordion, going in opposite directions on each fold.
2. Trace your pattern.
3. Before you cut, decide where the animals will be connected and DO NOT cut those parts. On the patterns below dotted lines suggest where you should not cut.
4. Then cut out your animal. When you open the paper, you will have a chain of animals!
